

HACKCWRU 2022 SUBMISSION INSTRUCTIONS

Please follow the following instructions to submit your project for judging. Failure to submit correctly could result in an inability to judge your project and disqualify you from the running. Each team only needs to submit the project one time!

Projects will be submitted through the HackCWRU 2022 Devpost
(<https://hackcwr-2022.devpost.com/>)

- Make an account if you do not have one already and join the event.
- Click the “Create Project” button
- In the Manage Team screen, add your teammates by entering their email or sending them the link provided
- Click continue and move to the Project Overview Page.
 - Project name can be whatever you would like, but please also include your team name that you used in the Discord Server. **(Example: TeamCWRU – Crypto Simulation)**. Including your team name will ensure that we attribute the project to the correct team. If your project is the same as your team name, then you can simply submit that
 - Enter an elevator pitch that gives a quick overview of how amazing your project is and what it does
- Click continue and move on to the Project Details
 - Fill out the project story (I recommend using the format that Devpost provides). This is a great place to give information about challenges you faced and other extra information that will not be in your demo itself. Judges will read this when judging your project so make sure it is well polished. **Please include the names and discord names of your team members in this!**
 - Complete the “Built with” portion. Please include every language, framework, api, or other tools you used to complete your project. If you used it, include it!
 - Try it out links is where you can provide links to your Github for the project, a website, or other extra resources that could be used by judges. Judges can use this to play around with your project if it is uploaded in this way. This does not replace a video demo!
 - If you have an image, you may submit it in the Image Gallery, however it is not necessary to do so
 - **Video demo link** - This is where you will submit your video demo. Please keep your video to around **3 minutes** long. If it is too long, it may not be fully watched. You will need to upload your video to Youtube or Vimeo and send a link through that. Things to include in your video:

- Brief introduction (Your team and where you go to school)
- The project itself, what it tries to accomplish or the problem it intends to solve
- The technologies you used
- Full demo of ALL functionality. Any functionality that you want the judges to see needs to be in the video
- Click continue to the Additional Info Page
 - Upload your source code in the “Upload a file” section. Please upload it as a zipped folder.
 - **Track Submission** – To submit your project to each track, click on the Sponsor/Special Tracks and select all that apply. You must opt in to every prize you wish your project to be judged on.
 - As a reminder, if judges find your project to not be relevant to the track, it will not receive a score for that track
 - We recommend that you submit your project to at most 3-4 of the HackCWRU Prizes and to as many of the MLH prizes as you feel are relevant.
- Submitting your project
 - Make sure to accept the terms and conditions, do one final check that everything is correct, and then submit your project
 - If you realize something is incorrect after submission, you can go back and fix it. If you cannot figure out how to do this, message [\[Hack CWRU\] Ryan](#) on Discord and he can fix it for you.
